

Standard A3 Print Portrait Template

(68mm x 96mm)

With Bleed

(74mm x 102mm)

Safe area: 66mm x 94mm

Trim area: 68mm x 96mm

Bleed area: 74mm x 102mm

Bleed area: 74mm x 102mm

Extend your background to fill the full 'bleed area' – it'll make sure you don't end up with white edges when your Business Card is trimmed.

Trim: 68mm x 96mm

This is where we aim to cut your Business Card.

Safe area: 74mm x 102mm

Keep all the important bits of your design – text, logo, icons – inside this area. (Not your background – that still needs to run to the edges of bleed.)

Do

- Edit and save your file in CMYK using the U.S. Web Coated (SWOP) v2.
- **Outline your text** before saving (select all of the layers, click "type" in the menu, select "create outlines").
- Text and images? Save your file as a PDF/x-1a.
- Just a photograph? Save as a high resolution JPEG (only if there's no text at all).
- **Delete the artwork guideline group layer** before saving.

Don't

- Flatten your layers or image before saving – it'll reduce your print quality.
- Add additional bleed or print/crop marks to your files – just save your file to the size of this template.
- Save as a multiple page PDF – each design will need to be uploaded individually
